Comments

The natural order of things worked again. Heckmondwike being the oldest and most experienced club were too good for the younger clubs and they were worthy winners.

But the gap is closing. The winners of Summer league (Heckmondwike) won 77% of their games but in this league only 60% & 55%. Huddersfield and Mirfield moved up from 37% wins to 50%, 48% & 38%. Running two teams does increase the number of less experienced players.

There were no 5-0 thrashings although a few 4-1 results were big defeats.

Although the margins are clear in the final table there were many close matches and 19 and 20 and 22 and 24 with a 2 win swing could have been so different.

A review will be held in the next few weeks and the league will almost certainly run again. The only definite for next autumn will be a start in first week in September which will avoid the last few weeks of the season being played in pouring rain.
